Cause

4 tips to keep your pipes from freezing

Ginny on the Job from Louisville Water is back with tips on how to protect your pipes from dropping temperatures | Video via Louisville Water

Fiction: Only a plumber can help prevent frozen pipes.

Fact: There are plenty of steps homeowners can take to prevent water lines from freezing. *Ginny from Louisville Water has you covered.*

Here are 4 tips to help when the temperatures start to drop:

- Wrap any exposed pipe in your home with insulating material or heat tape
- Let a steady stream of water the size of a pencil lead drip through your cold water faucet.*
